### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lyle Kimms on March 13, 2006.

The application has been amended as follows:

In the claims:

In claim 3, --a-- has been added before "musical instrument" in the first line of the claim, as well as the addition of --,-- before "comprising", also in line 1.

In claim 5, --for-- has been added before "practicing" in the first line of the claim, as well as --instructions for-- after the word "including", in the second line.

Also, in claim 5, line 3, "a model music data input module for" has been deleted. Line 7, "a display module for" has been deleted. Line 12, "a performance data input module for", has been deleted. Line 14, "a practice mode switching module for", has been deleted, and line 15, "a performance data takeout module for" had been deleted.

## **DETAILED ACTION**

### **Drawings**

The amendment to Figure 6, or more specifically the addition of the Prior Art title, is accepted.

### **Cancellation of Claims**

The cancellation of claims 1, 2 and 4 is accepted.

Claims 3 and 5 are allowed.

2. The following is an examiner's statement of reasons for allowance:
3. The prior art relied upon in the first office action rejection by Tice et al. (US 2002/0004191), no longer teaches all the claimed elements of the independent claims 3 and 5, and no other prior art references could be found that teach said claimed elements, therefore these two independent claims are considered allowable.
4. In terms of claim 3, Tice et al. teaches a music training device which consists of displaying musical score data, inputting performance data and playing back designated audio, but the applicant is corrected in stating that even though Tice et al. provides the option of a practice mode, Tice et al. does not teach the apparatus having a switching device related to the practice mode, which allows for the takeout of performance data, representing either a musical performance coinciding with a musical score of a model

music piece for practice, or performance data prepared specifically for playing back tones of the model music piece for practice. Tice et al. merely teaches separate practice “rooms” associated with the apparatus.

5. In terms of claim 5, Tice et al. teaches the similar features as stated above but again does not teach a switching device, which controls the takeout of performance data.

6. Other references found, such as Choi (5,495,786), teach practice modes within an apparatus, but with for example Choi, a switching device is provided only for moving through the practice options, such as the different scales available for practicing, i.e. minor, major, etc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
